Hong Kong Debt Dashboard

香港債務儀

Debt is a by-product of economic growth – All developed countries have debt.

債務是經濟增長的副產品。因所有發達國家都有債務。

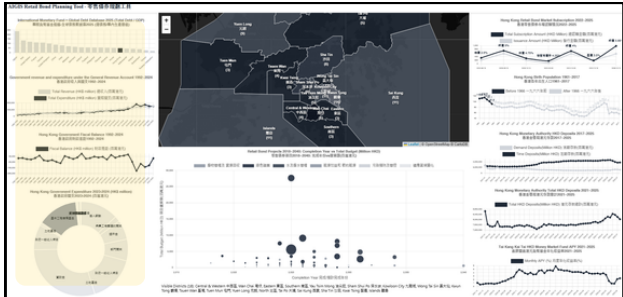

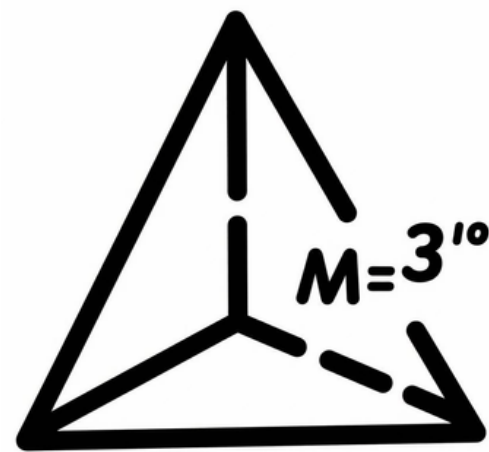

Spending on public projects brings lasting happiness. 將錢用於財政投資，幸福感才會長久。

Hong Kong Government Fiscal Balance 1992~2024
香港政府財政差距1992~2024

在2021至2023年，香港庫房因派糖虧損。這就像家庭一次性派錢買禮物，短暫開心，但無法持續；而在2025年，其實用好財政投資，香港庫房就收支平衡。
From 2021 to 2023, Hong Kong treasury lost money due to cash handouts. It is like a family giving out gifts — fun for a moment, but not sustainable.
By 2025, smart public investment helped balance the budget.

Retail bond money was used for projects across Hong Kong.

But why can't people see or feel the benefits?

全港有用到零售債券錢興建項目。但為何市民看不見、感受不到幸福？

最多項目的地區是觀塘、西貢、離島、北區；單是四個地區，就合共有超過四十個項目。
Kwun Tong, Sai Kung, Islands District, and Northern District have the most projects—over 40 in total across just these four areas.

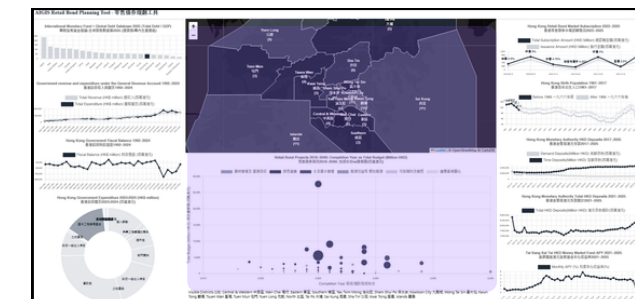

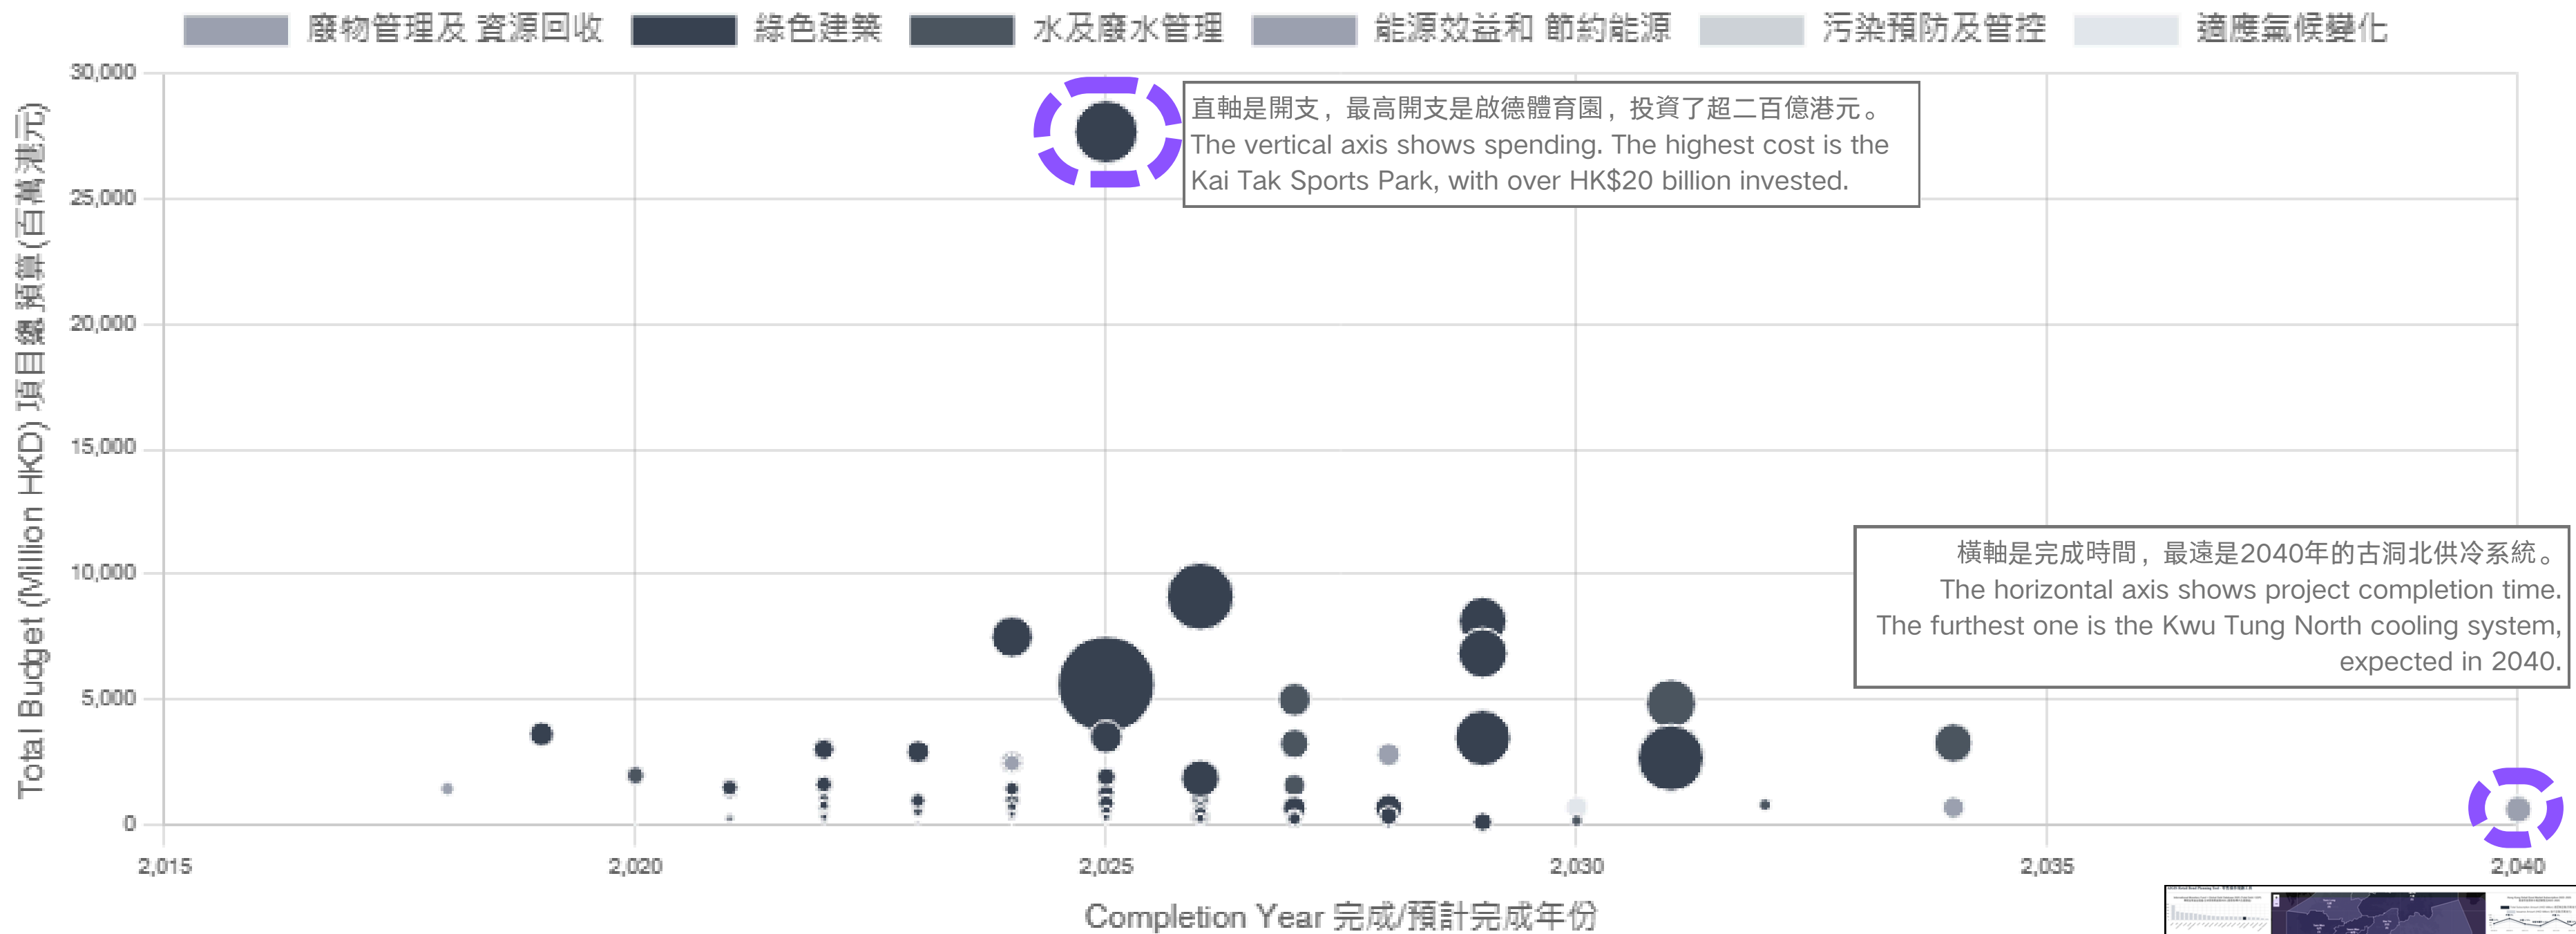

Small community projects make up less than 15%.

That's why people feel the money is spent on things that are “too big and too far away.”

小型民生僅佔不足十五%。市民自然覺得錢花得「太高太遠」。

觀塘翠屏河的天橋底，是起動九龍東的綠色活化項目。雖然這只是天橋底，但這是夏天陰涼位，下雨有頂蓋，讓一群附近工作的建築工人在這午休的地方。

Even though it is just under a bridge, it is cool in summer and covered when it rains — making it a popular lunch spot for nearby construction workers.

When families have extra savings, they tend to put it into retail bonds with higher interest.
每個家庭有多餘的生水，會選擇流向利息較高的零售債券水池。

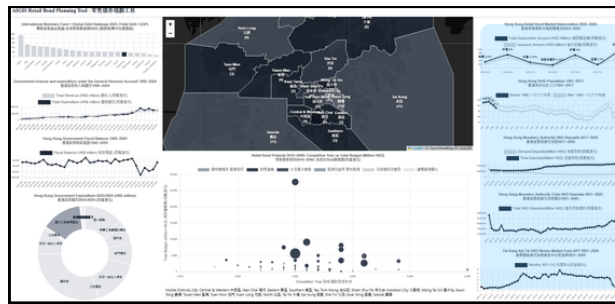

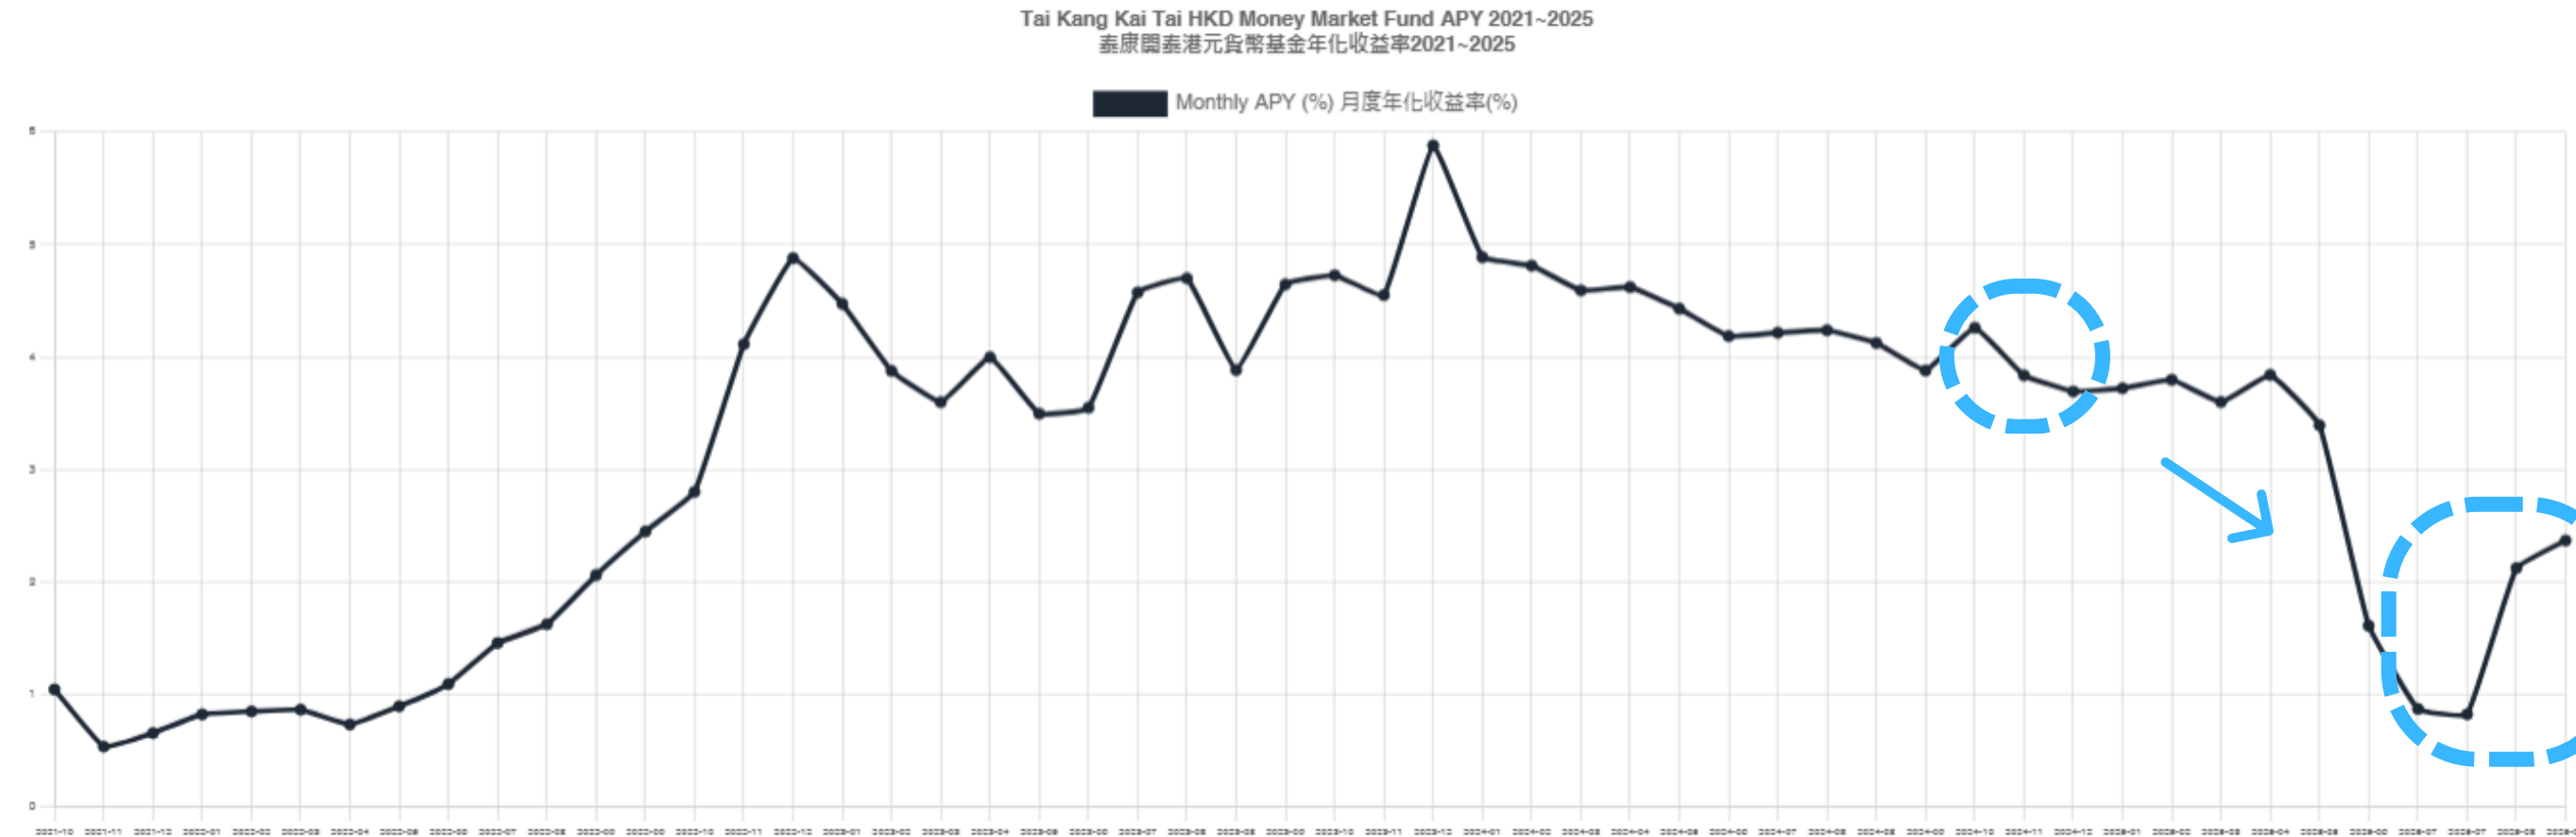

2024年12月，M2存款增長，即家庭少了生水買基債。

相反，在2025年9月，M2存款和現金寶回報雙雙下降，就多了近400億生水買銀債。

In December 2024, M2 deposits grew, meaning families had less extra savings to buy infrastructure bonds.

In September 2025, both M2 deposits and cash fund returns dropped, so families used nearly HK\$40 billion more to buy silver bonds.

Smart finance builds a happy city. Retail bonds connect to everyday life.
